124 responses

What percentage of teachers use ICT such as LCD projector, multimedia etc while teaching?

124 responses

The overall quality of teaching learning process in your institution is very good .

124 responses

Give three observation /suggestion to improve the overall teaching learning process in your institution.

- No suggestions
- No suggestions
- Nothing
- No suggestion

- Everything is good I guess there is no observation or suggestions to improve the teaching processing bz they have done their teaching job very we'll
- No suggestions..
- use projectors or smart class to understand the concepts well
- Teachers commonly evaluate internal assessments based on their favourite students and rest all other students are more likely to attain less than half of the mark.
- Give a prompt feedback, like appropriate feedback on their performance whether it may be moderate one or the neutral which depends on them (students) because, even the students need help in evaluation in their current knowledge & their capabilities too this may help in their up coming results .
- Encourage each and every students. Don't make partiality with students, because it effects them mentally...
- Shuffle the students in each class . Every students may make what teachers say..so stop saying 2 or 4 student to make seminar etc.
- Installation of projectors in each class
- Try to Finish the syllabus before exams
- None
- Nothing
- Overall everything is good
- one thing i would like to say is while taking attendance the two guys will come to class in middle while your calling attendance what happens is that the one guy who is from the starting roll no will not get attendance so the other who is somewhat nearer to last roll no will get attendance so either don't give for both...
- Compulsory aptitude test for all students Conducting sessions at least thrice a month about how to face interview and what next after our degree
- Understand our problem first
- More programs on life skills and employability skill development.
- Nothing.. Everything is good..
- Good but has to develop more modern teaching methods
- Good teaching skill
- Use more effective method of presentation
- Freedom and space
- Good
- The Teaching way can be more effective
- Try to make teaching understandable and not boring
- Good interaction with weak students.
- More of practical training than theory should be adopted.
- Solving previous years question papers
- No suggestion mam and sir
- Complete the portion bit earlier
- Each teachers teaching is different from each other we can't judge overall from above questions Overall teaching is good, each and every teachers put their 100% on us to understand clearly the concepts
- Giving more examples and take the classes
- Should give equal opportunity for every student Library period should be given atleast once in a week

- Giving enough examples about the topic so that the students can get enough information. And I think teachers should use more and more LCD projectors while teaching it would be more entertaining and easy to understand the concept.
- Explain the topic with animated videos
- Mainly interacting with students while teaching in English to improve our communicating skill
- Try to complete portions well in advance. Prepare students for internals.
- Teaching process is very good
- All students must get equal opportunity. 2. Correct teacher for correct subject.
- Add more practical session
- By giving needed skills, more trainings to student in their specific interested fields.
- No suggestion
- Bsc students must be taken to some industries (chemical Or any other) 2. Importance must be given to Internship programs 3. Digital learning should be encouraged

- Don't restrict the programmes only to particular students (like nss, rotaract students etc). Include all interested students to participate in the programmes.
- Encourage the students to participate in the competitive exam and also give complete details about that.
- Use black board effectively while teaching and use of projector would also be more effective.
- 1) make sure of students presence in the class 2) always explain with an example 3) good interaction with students while teaching
- Explanations should be more detailed than in the textbooks. No partialities should be done between any students in the class. The proper guidelines should be given to all of the student in a particular class and if the teacher feels any inappropriate change in an student, then do approach the same student rather than revealing indirectly in front of the whole class.
- There is no any suggestion require because the teaching was very good. And our teachers are best in each and every time.
- At present teaching level is Good. This institution support to both Studies & Co-curricular activities.
- No suggestion
- Learning should not limit within 4 walls of the college overall learning should include doing experiments in our own college, visiting at least once in companies to know about their working activities ,communications etc, and seeking any help that we can provide them by making websites for them
- Have to improve the lab equipment And giving examples while teaching
- Don't do partiality in giving internal assessment marks... Always giving full marks to the student who is topper in the class or to their pet students if they got less marks in internal exams...
- Already there teaching is good
- The teaching and support of teachers must be continued
- Make compulsory to participation of every student in extra curricular activity...to grow their self confidence!!
- They must friendly with us They should not point to particular student and insult them They shouldn't give mental torches to us and force us to participate in particular activities Govindas pu college teaching staffs are excellent and friendly with us ..
- Let them treat every student in the same manner

- 1. Concentrate more on practical learning. 2. Interact with students while teaching in order to improve communicative skill. 3. Talk more about the recent issues going around, along with syllabus.
- Teachers should prepare more
- Try to deduct fees of this academic year, try to collect only tuition fees
- carrier guidance related to the subject
- Teachers should communicate to all the students in class
- Good education excellent teaching College can give more importance to seminars
- Good communication with students... And well understand students
- My lecturers are very supportive and try to interact with almost every student during class. They make sure that all Students are actively listening to their lecture.
- make teaching simple and modern
- Everything is perfect...teaching faculty, explanation...etc
- It is glad to say that our college is very good for learn moral and technical education.
- Overall teaching learning process is good. Thank you.
- Excellent teaching and always encourage students in all activities.
- give more exposure to research and paper presentations.
- It provides good teaching-learning environment.. staffs always give their best to understanding the topics.. very well teaching.. Thank you
- Students should be encouraged based on their skills and not by their marks.
- While explaining the topic give more example
 - Provide campus selection • Provide a good/bit huge staff room for the M.Sc faculties • Laboratory must be improved
- Good
